

Docket No.: 60097-0029

AMENDMENTS TO THE SPECIFICATION:

Please replace the paragraph on page 9, lines 24-31 with the following paragraph:

Referring to Fig. 7, the input side of the Media Switch 701 is connected to an MPEG encoder 703. There are also circuits specific to MPEG audio 704 and vertical blanking interval (VBI) data 702 feeding into the Media Switch 701. If a digital TV signal is being processed instead, the MPEG encoder 703 is replaced with an MPEG2 Transport Demultiplexor, and the MPEG audio encoder 704 and VBI decoder 702 are deleted. The demultiplexor ~~multiplexes~~ sends the extracted audio, video and private data channel streams through the video input Media Switch port.
